EDUCATION

Engineer's degree
Esprim
2024

Licence degree
Isitcom hamem sousse
2021

Baccalaureate's degree
lycee garcon sousse
2020

SOFT SKILLS

- Communication
- Teamwork
- Critical thinking
- Time management
- Leadership
- Adaptability
- Project Management

HARD SKILLS

- Network Security
- Penetration Testing
- Vulnerability Assessment
- Cryptography Basics
- Reverse Engineering
- Docker, Kubernetes
- OpenStack, GNS3
- CI/CD Basics

PROFESSIONAL OVERVIEW

Cybersecurity Engineering student with hands-on experience in CTF competitions, network security, and cloud infrastructures. Skilled in penetration testing, system security, and DevSecOps, with practical experience using Docker, Kubernetes, OpenStack, and GNS3. CCNA and CyberOps certified, with strong ability to analyze threats and design secure, scalable systems.

HACKATHONS & COMPETITIONS

nsight Hackathon : IEEE ESPRIT SB: Solved real-world cybersecurity challenges and proposed secure solutions under time constraints.

CyberCamp 6.0: INSAT: Completed intensive training with hands-on labs in network security, penetration testing, and system hardening. Simulated real-world attack/defense scenarios (Red Team / Blue Team) to strengthen practical security skills.

Mini CTF: Polytechnique Sousse: Achieved 4th place (team ranking) solving crypto, web security, and reverse engineering challenges. Developed strong analytical thinking, problem-solving, and teamwork in competitive environments.

PROJECTS

Secure Private Cloud Deployment with GNS3 & OpenStack | 2026

Designed and deployed a secure private cloud hosting the HQ_Audit application with microservices architecture and network segmentation.
Tech: OpenStack, GNS3, Docker, Kubernetes, Linux, Networking

Gestecom Gesture Recognition System | 2025

Developed a computer vision system for sign language detection with chatbot integration and multi-platform apps (desktop & web).
Tech: MediaPipe, OpenCV, Python, JavaFX, Symfony, Gemini API

Connection Interruption Detection System | 2025

Web & mobile platform for detecting and reporting fiber optic outages for enterprise clients, with automated alerts to technicians.
Tech: Symfony, Firebase, REST API, Leaflet.js, MySQL

Clothing Store – Mobile & Web E-commerce App | 2024

Full-stack e-commerce app enabling product browsing, cart management, and secure online payments across web and mobile.
Tech: React.js, React Native, Node.js, Firebase, Stripe API

Virtual Driving Simulator | 2023

VR-based driving simulator providing immersive training scenarios (traffic, night, weather) for safe driver education.
Tech: Unreal Engine, Blender, Meta Quest, Node.js
